

# C&NW Twin Cities "400" kits in 'O' scale

These car kits represent the original order of Twin Cities "400" streamline cars built by Pullman Standard in 1939.

Car #3400-3401 are coaches with stewardess room  
 Car #3410-3415 are straight 56 seat coaches  
 Car #6500-6505 are parlor cars  
 Car #6950-6951 are 56 seat diners  
 Car #7500-7501 are baggage-tavern-lunch counter-lounges.

The later cars were, for all practical purposes, identical. These cars served the C&NW up into the 1960's when many were sold to equipment dealers, Mexico, the Great Northern, Northern Pacific, and the CB&Q. Some coaches and lounges lasted into the Amtrak era on the C&NW and finally converted to M-O-W.

These kits are craftsman-type which require some minor cutting, filing and bending. The sides are .025" aluminum (including skirting) so it is very workable. The truck openings are cut and the skirt is pre-bent. The windows are punched and decal overlay is supplied for vents and access doors. The roof and ends are ICC styrene plus a wooded floor. Detail parts included are: vestibule doors, Pullman s' line vents, formed ladder grabs, wire for side grab irons.

As a bonus...included with each order is a Fox Head "400" beer label. The beer was brewed in Waukesha, WI and named after the Capital "400".

## PRICE LIST
